Supplementary Provisions

Approval	Prepared by	Reviewed by	Approved by	Authorized by	CEO

1. Overview

1.1 Purpose

Hyundai Polytech, as an automotive parts manufacturing company, recognizes its responsibility to minimize environmental impacts arising from its business activities.
This policy has been established to prevent deforestation and forest degradation, contribute to biodiversity conservation, and promote a sustainable supply chain.
The purpose of this policy is to prevent and mitigate potential deforestation risks not only from Hyundai Polytech's direct operations but also throughout its procurement and supply chain activities.

1.2 Scope of Application

This policy applies to Hyundai Polytech's headquarters, domestic and overseas business sites, and research and development activities.
Hyundai Polytech also encourages its suppliers, contractors, and business partners to understand and comply with the principles set forth in this policy.

2. Basic Principles

Hyundai Polytech endeavors to prevent deforestation across all stages of its business activities, including the procurement of raw materials, production, and distribution, based on the following principles.

2.1 Prevention of Deforestation

Hyundai Polytech makes reasonable efforts to prevent illegal deforestation, forest conversion, and forest degradation throughout its operations and supply chain.
In particular, the Company recognizes potential risks associated with raw materials or

sourcing regions with a high risk of deforestation and promotes preventive management measures.

2.2 Compliance with Laws and International Standards

Hyundai Polytech complies with all applicable forest and environmental laws and regulations in the countries and regions where it operates.
The Company respects internationally recognized standards and principles, including the Universal Declaration of Human Rights, the UN Guiding Principles on Business and Human Rights, and the core conventions of the International Labour Organization (ILO).
Hyundai Polytech also continuously monitors major global regulatory trends related to deforestation, including the EU Deforestation Regulation (EUDR).

3. Management System

3.1 Risk Identification and Awareness

Hyundai Polytech identifies potential deforestation-related risks arising from its business operations and supply chain activities and reviews procurement structures and business practices as necessary.

3.2 Preventive and Improvement Measures

Where deforestation-related risks are identified, Hyundai Polytech takes reasonable improvement measures in consideration of applicable laws and contractual relationships.
The Company seeks to mitigate risks through communication and cooperation with its suppliers and business partners.

3.3 Governance

Hyundai Polytech manages the implementation status of this policy through its environmental and sustainability management functions.
Where necessary, the Company reviews improvement actions through internal reporting and management processes.

4. External Cooperation

4.1 Information Disclosure

Hyundai Polytech discloses key policies and activities related to deforestation prevention and environmental protection through its website, sustainability materials, or upon reasonable request from customers and stakeholders.

4.2 Stakeholder Engagement

Hyundai Polytech cooperates with key stakeholders, including suppliers and customers, to recognize deforestation risks within the supply chain and promote responsible sourcing practices.

Supplementary Provisions

This policy shall take effect as of the date of enactment.
Hyundai Polytech may review and revise this policy periodically in response to changes in relevant laws, international standards, and business environments.
